We at Secoa BV. are selling chemical products worldwide for several different industries. For some of the chemical products that we sell, there are additional obligations for down-stream users to create a safer workplace for it's employees.

For working with diisocyanates the European body **ECHA** has implemented a mandatory training course (REACH Restriction 2020/1149/EU) for professional workers since august 24, 2023. This course is intended to create awareness about the risks from working with diisocyanates and to reduce the (possible) exposure to released diisocyanate vapors.

If the product that you have purchased contains a diisocyanate component according to one of the following **CAS** or **EC numbers** you are obliged to adress and inform your employees about the diisocyanates course and it's purpose.

Name	CAS number	EC number
2-methyl-m-phenylene diisocyanate	202-039-0	91-08-7
